GEMINI EMINENCE

SAP SOLUTIONS:

It is a complete, cloud & On-Premises based solution that can run your entire organization: financials, human resources, sales, procurement, customer service, project management, production, supply chain etc. The ongoing success of your growing business greatly depends on its ability to proactively manage all areas of business effectively and efficiently. In order to remain agile, you need to ensure your organization can keep up with quickly changing market conditions and customer demands.

OPEN SOURCE SOLUTIONS:

Open Source has become the norm of life in the present day technology driven eco system. The latest inculcation of this technology into Internet of Things (IOT) is one of the key breakthroughs in the recent past. The ability to create an agile enterprise means organizations may have to consider portfolio consolidation, modernization, and outsourcing to maximize cost savings and Return on Investment (ROI). Keeping this in mind, Gemini Consulting and Services is dedicated to delivering advanced solutions on Open Source allowing you to do more.

MOBILITY SOLUTIONS:

When we consider mobile infrastructure, it's easy to see that it provides the very foundation on which enterprises create their mobile solutions. This means that it must be both pervasive and well-designed. However, the infrastructure is quite often neglected due to a rising issues within the business that need immediate attention. As technology evolves, people's expectations are not only to use their phones to manage their personal life but their professional life as well. In fact, the line has become so blurred that many don't acknowledge the term 'office hours' because work is always just a click away. Thus, mobile technology has become a way to improve customer satisfaction and increase their profit margins.
